

MetaTrader 4 **MultiTerminal**

5 basic steps for working with platform

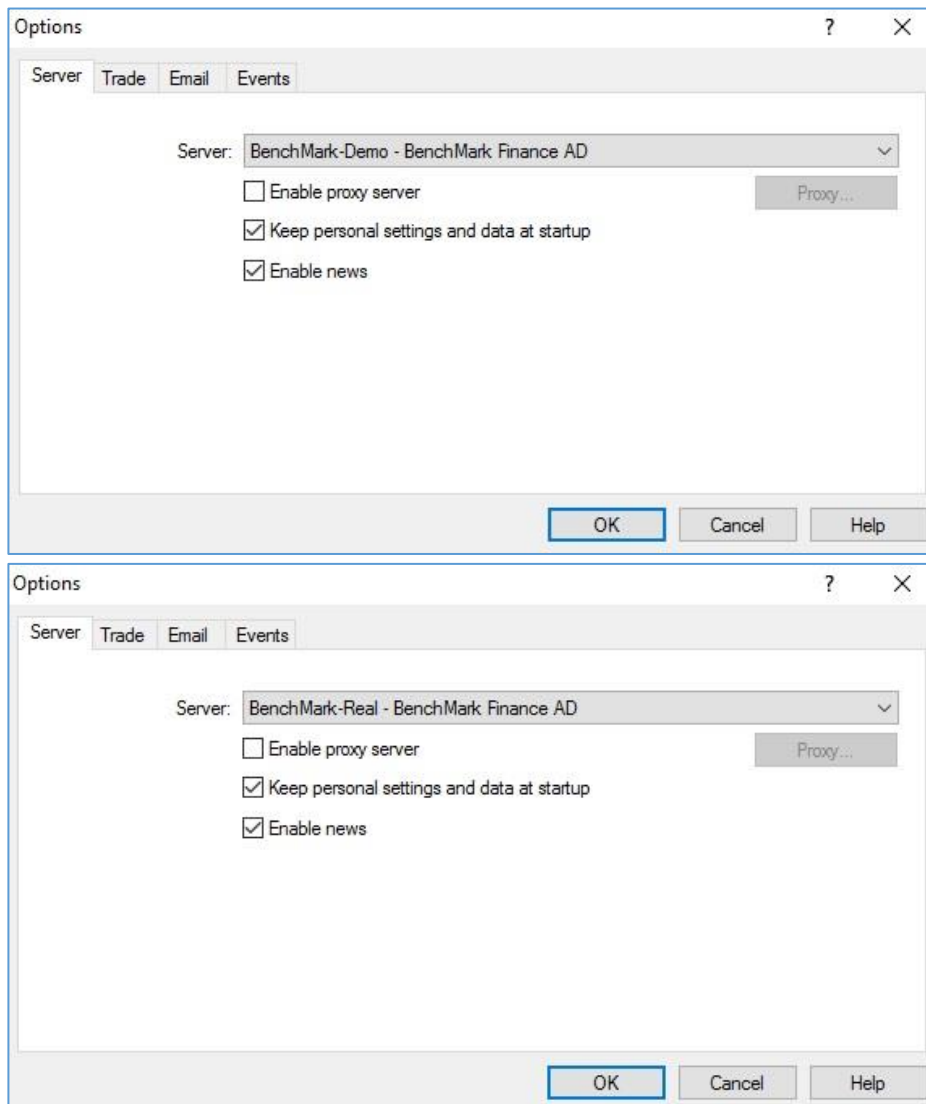

MetaTrader MultiTerminal is a product that allows the management of several trading accounts simultaneously. MetaTrader MultiTerminal is compatible with: Microsoft Windows XP/2003/Vista/2008/7/8/10. Processor with SSE2 (Pentium 4/Athlon 64 or higher) is also required for the system to function properly.

Basic steps for working with MetaTrader MultiTerminal:

Step 1 – You can use MetaTrader MultiTerminal by registering a demo or a real account. Switching servers between demo and real is done from here:

Step 2 – A demo account can support up to 10 trading accounts. The real client's terminal supports up to 128 trading accounts. In order to connect 2 or more trading accounts, username and password for each trading account must be typed here:

The image shows two instances of the 'New Account' dialog box. The top instance is a standard Windows-style dialog with a title bar containing 'New Account' and several icons. The main area contains a green person icon, a message: 'This form allows you adding a new account for the server 'BenchMark-Demo''. Below this are two input fields: 'Login:' and 'Password:'. At the bottom are 'OK' and 'Cancel' buttons. The bottom instance is a similar dialog, but the 'OK' button is highlighted with a red rectangular box.

Step 3 – Volume allocation:

The image shows the 'Sell by Market' dialog box in MetaTrader. The 'Symbol' is set to 'GER30'. 'Stop Loss' and 'Take Profit' are both set to '0.00'. 'Total Volume' is set to '1.00'. The 'Lots Allocation' dropdown menu is open, showing five options: 'total volume for each order', 'predefined volume', 'total volume for each order', 'equal parts', and 'on equity ratio'. Below the dialog is a table with columns for Account, Status, Volume, and Action.

Account	Status	Volume	Action
990078260, BenchMark-test	10750.55 / 10751.45	1.00	Sell by Market
990078261, BenchMark-test1	10750.55 / 10751.45	1.00	Sell by Market
990078262, BenchMark-test2	10750.55 / 10751.45	1.00	Sell by Market

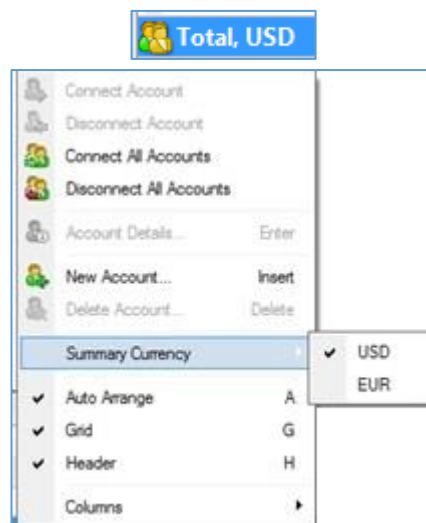

As you can see from the picture above, there are five different volume allocation methods available:

- **Predefined Volume**-volumes for each trading account are typed manually in “Volume”
- **Total Volume for each order**-each position is opened with the volume in lots that is predefined in “Total volume”
- **Equal Parts** –total volume is distributed in equal parts between accounts
- **On equity ratio**-chosen volume is allocated as a ratio of current equity between trading accounts
- **On free margin ratio**-volume is distributed as a ratio of free margin between trading accounts

If the client manages both euro and usd-denominated accounts, he will be able to open trades either on the euro, or dollar denominated accounts. The reason behind this is a feature in the names of instruments in the euro-denominated accounts-they contain the suffix “euro”. Despite that, all of the accounts will be connected, but the instruments in one of the account types will have to be selected manually.

Step 4 –The “currency summary” box can be selected by clicking “Total”. It is useful whenever the client is managing both euro and usd-denominated accounts.

Opening and closing trades, as well as placing resting orders is done the same way as in MetaTrader 4.

Step 5 – Closing positions

- **Close** – For closing individual positions:

Symbol: EURUSD, Euro vs US Dollar

Attention! The trade will be executed at market conditions, difference with requested price may be significant!

Close

Account	Trade	Volume	Action
<input checked="" type="checkbox"/> 990078260, BenchMark-test			Close
	<input checked="" type="checkbox"/> #703372866 sell 1.00 EURUSD at 1.07214	1.00	Close 1.00 at market
	<input checked="" type="checkbox"/> #703372918 sell 1.00 EURUSD at 1.07214	1.00	Close 1.00 at market
	<input checked="" type="checkbox"/> #703372922 buy 1.00 EURUSD at 1.07225	1.00	Close 1.00 at market
	<input checked="" type="checkbox"/> #703372923 sell 1.00 EURUSD at 1.07214	1.00	Close 1.00 at market
	<input checked="" type="checkbox"/> #703372928 buy 1.00 EURUSD at 1.07248	1.00	Close 1.00 at market

Orders: 27 | History: 3 | New: 3 | **Close: 15** | Close By: 3 | Multiple Close By: 3 | Pending: 3 | Modify | Delete

- **Close By** – For closing positions simultaneously. The client chooses which ones to close by:

Symbol: EURUSD, Euro vs US Dollar

Close By

Account	Trade	Action
<input checked="" type="checkbox"/> 990078260, BenchMark-test	#703372866 sell 1.00 EURUSD at 1.07214	Close #703372866 by #
	<input type="radio"/> #703372922 buy 1.00 EURUSD at 1.07225	
	<input type="radio"/> #703372928 buy 1.00 EURUSD at 1.07248	

Orders: 27 | History: 3 | New: 3 | Close: 15 | **Close By: 3** | Multiple Close By: 3 | Pending: 3 | Modify | Delete

- **Multiple Close By** – In order to net existing positions:

Symbol: EURUSD, Euro vs US Dollar

Multiple Close By

Account	Trade	Action
<input checked="" type="checkbox"/> 990078260, BenchMark-test		Multiple Close By
	#703372866 sell 1.00 EURUSD at 1.07214	
	#703372918 sell 1.00 EURUSD at 1.07214	
	#703372922 buy 1.00 EURUSD at 1.07225	
	#703372923 sell 1.00 EURUSD at 1.07214	
	#703372928 buy 1.00 EURUSD at 1.07248	

Orders: 27 | History: 3 | New: 3 | Close: 15 | Close By: 3 | **Multiple Close By: 3** | Pending: 3 | Modify | Delete
